

# mcclean-370L

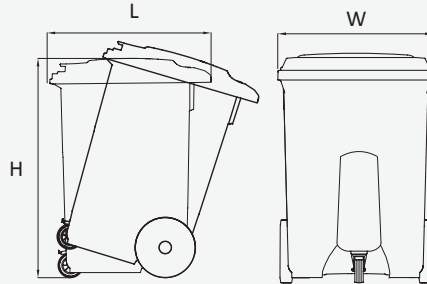

# mcclean-370L

## Raw Material

Made from virgin high quality UV resistant HDPE material providing good strength, superior processing performance and excellent impact resistance.

## Weight/Load Efficiency

A 370 l trash bin has a weight of 22 kg while its carrying capacity is 170 kg, in other words it carries a garbage load of 7.5 times its weight.

## Colors

The standard bin color is green. However, customers have a wide variety of lid colors to choose from, to indicate the type of waste the bin carries. Separating different waste streams at source (also called source separation) plays a crucial role in facilitating waste collection, reuse & recycling, as well as applying sustainable solid waste management practices.

## FEATURES AND DATA SHEET

## TECHNICAL DATA

### Design

McCLean offers a wide range of mobile garbage bins (MGB) and waste containers, fitted for ergonomic design and robust features.

### Adherence to standards

The product line is manufactured in accordance with ISO 9001 processes and complies to EN840, the recognized European Standard for the manufacture of mobile garbage bins (MGB) and its health and safety requirements.

### Wide color scheme

Availability of a wide color palette in sync with waste stream standards

### Long service life

Manufactured from virgin polyethylene of high density for additional strength and longer life durability.

### UV Resistance & Other

Special additives for UV- stabilization provide outstanding ageing characteristics in addition to resistance to decay, frost, heat and a wide range of chemicals

### Prepared for transponders: Yes

Ideal for separate waste collection given its suitability for all DIN lifting equipment

### Noise reduction

Compliant with noise reduction regulations using quiet running rubber tires and tight fitting axle

### Recycling

All container parts & accessories are recyclable at the end of the product cycle

### Multiple applications

Wide usability for commercial & office building waste, household & compound refuse, street & neighborhood garbage, sports club & golf court organics and other

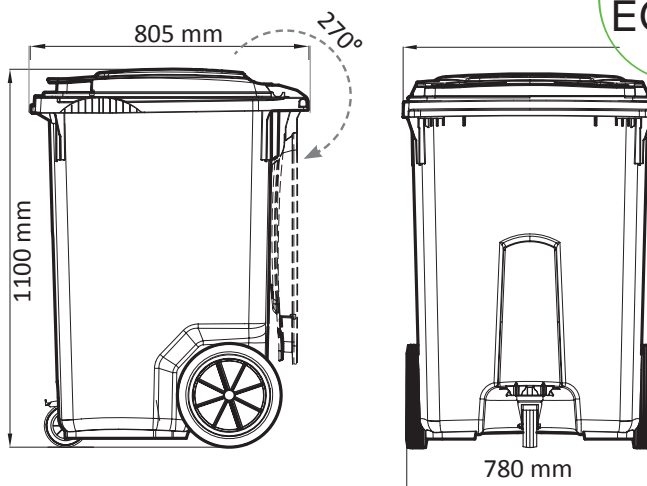

### Weight and Dimensions

Container volume	(l)	370
Carrying weight	(kg)	170
Total weight	(kg)	23
Overall height	(mm)	1100
Overall width	(mm)	780
Overall depth	(mm)	805

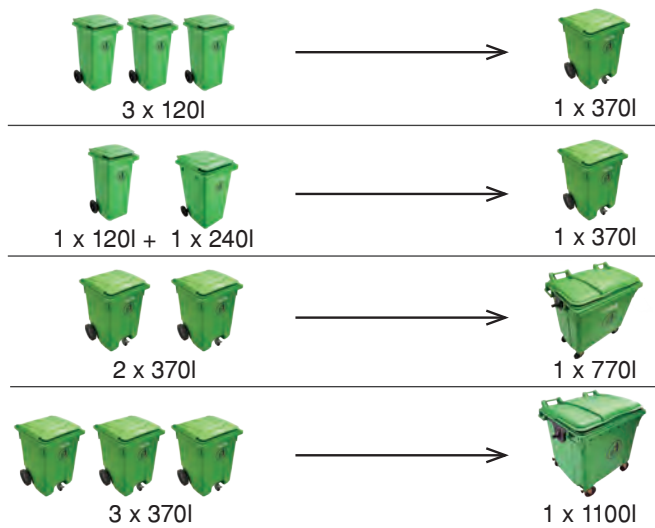

2 Rubber Wheels Ø 300 mm

Optional Third Wheel (Swivel) Ø 125 mm

Made In  
EGYPT

### Size Comparison 370l

## YOUR EVERDAY BIN

### TILTING

The 370l trash bin is fitted with two rear wheels to facilitate container movement and handling, using a tilted position by the person in charge

Recessed foot step at the rear

### FOOT STEP

A recessed foot step is added at the rear for additional support when tilting the bin

### THIRD SWIVEL

The same bin introduces the option of a third wheel using a steady forward-pushing position without tilting, for further maneuverability and undemanding operation

## Integrated Product Range

# MCCLEAN-370L

## INDOOR & OUTDOOR USAGE

### Wide range of customers

- Business parks/ office buildings/ companies
- Industrial parks/ factories/ warehouses
- Compounds/ gated communities & residential property
- Malls & Commercial districts (shops, restaurants, cafes etc.)
- Hospitals, laboratories and medical centers
- Universities & schools
- Neighborhoods/ public services & works

### THE BENEFITS OF HDPE

- Light & safe to transport, stack & handle
- Eco-friendly & Recyclable
- Impact Resistant and has long life span
- Frost-proof, Water-proof & Rot-proof
- UV Resistant

### PERFORMANCE & COMPLIANCE WITH STANDARDS

McClean has considered full compliance to the EN 840 standards when it comes to the production and testing of the 370l bin and its choice of features

## Integrated Product Range

400l Pushcart Bin

400l Tricycle Bin

770l Bin

1100l Bin
